# User Stories

## GROCERY LIST

---

As a user I want the ability to add items to a list so that I can have a grocery list.

As a user I want the ability to decide if an item is needed or wanted so that I can prioritize my list.

As a user I want to be able to see items I need and want in separate lists so that I can compare items to decide on importance.

As a user I want to be able to move items from wanted to needed so that I can further prioritize my list.

As a user I want to be able to save my lists so that I can retrieve them later.

## CONTACT LIST

---

As a user I want to be able to add people to a list so that I can create a list of contacts.

As a user I want to include first name, last name, phone number and email in each contact so that the contact in my list is complete.

As a user I want to be able to remove contacts from my list so that I can have a list of only the contacts I want.

As a user I want to be able to edit contacts from my list so that I can update a contact if their information changes.

As a user I want to be able to save my contact list so that I can look at it at a later time.

USER  
STORIES

## TIC TAC TOE

---

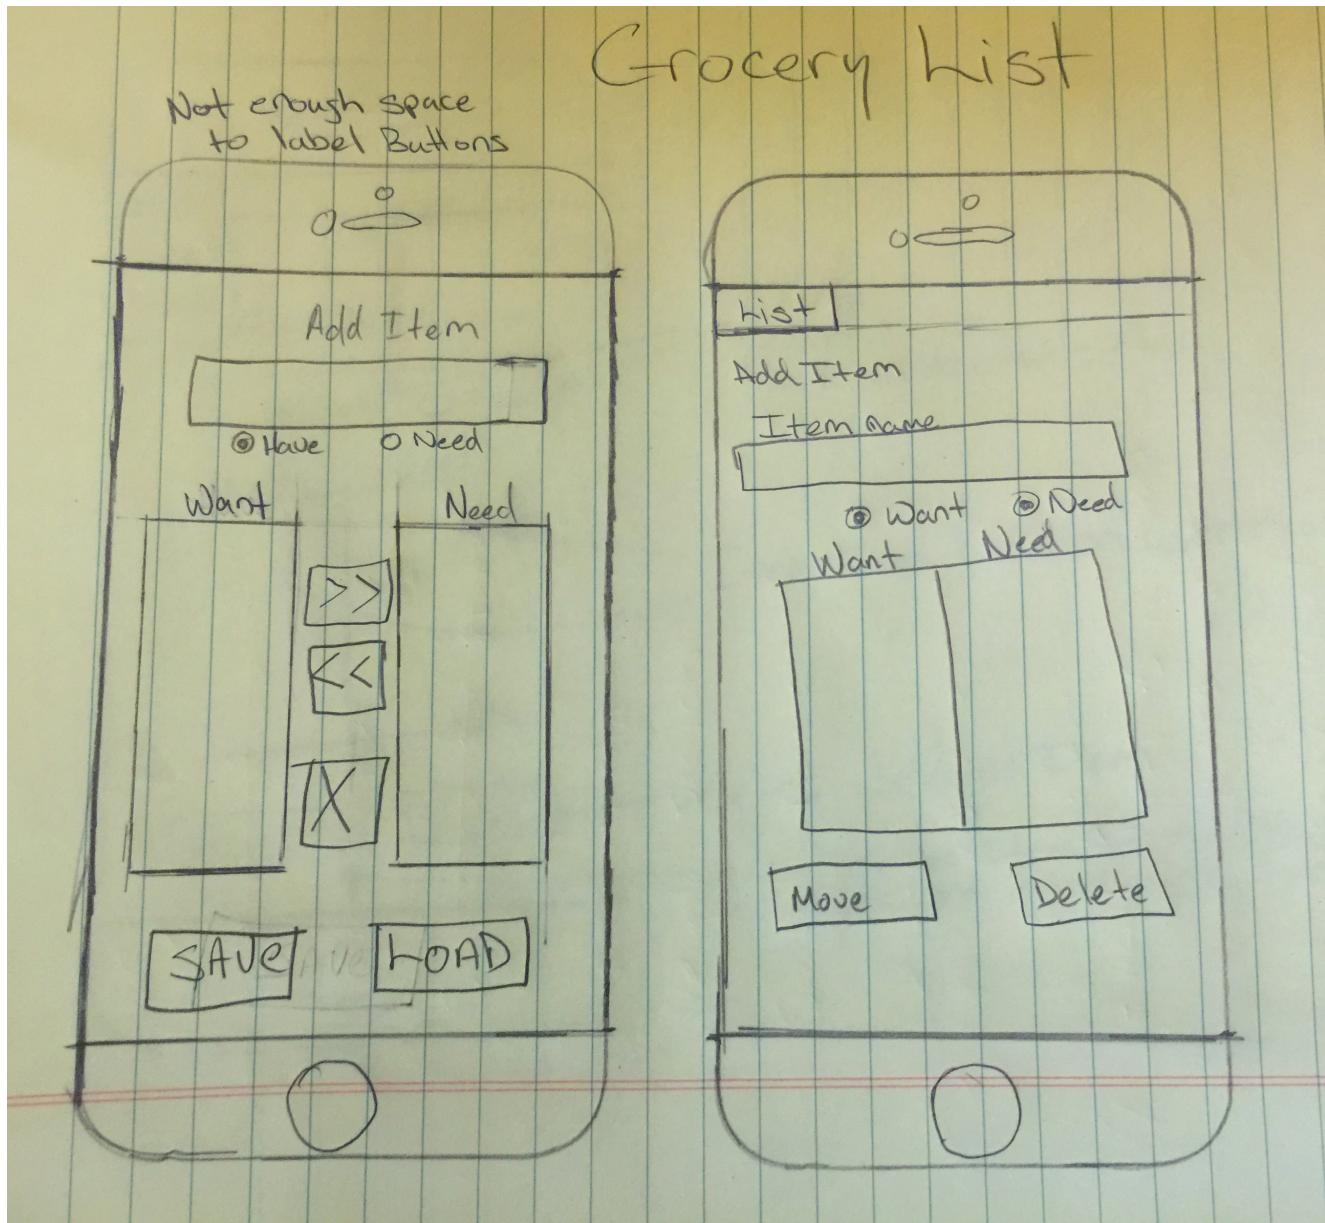

As a user I want to play tic tac toe with another user so that I can play with my friends.

As a user I want to take turns playing so that the game will be as realistic as possible.

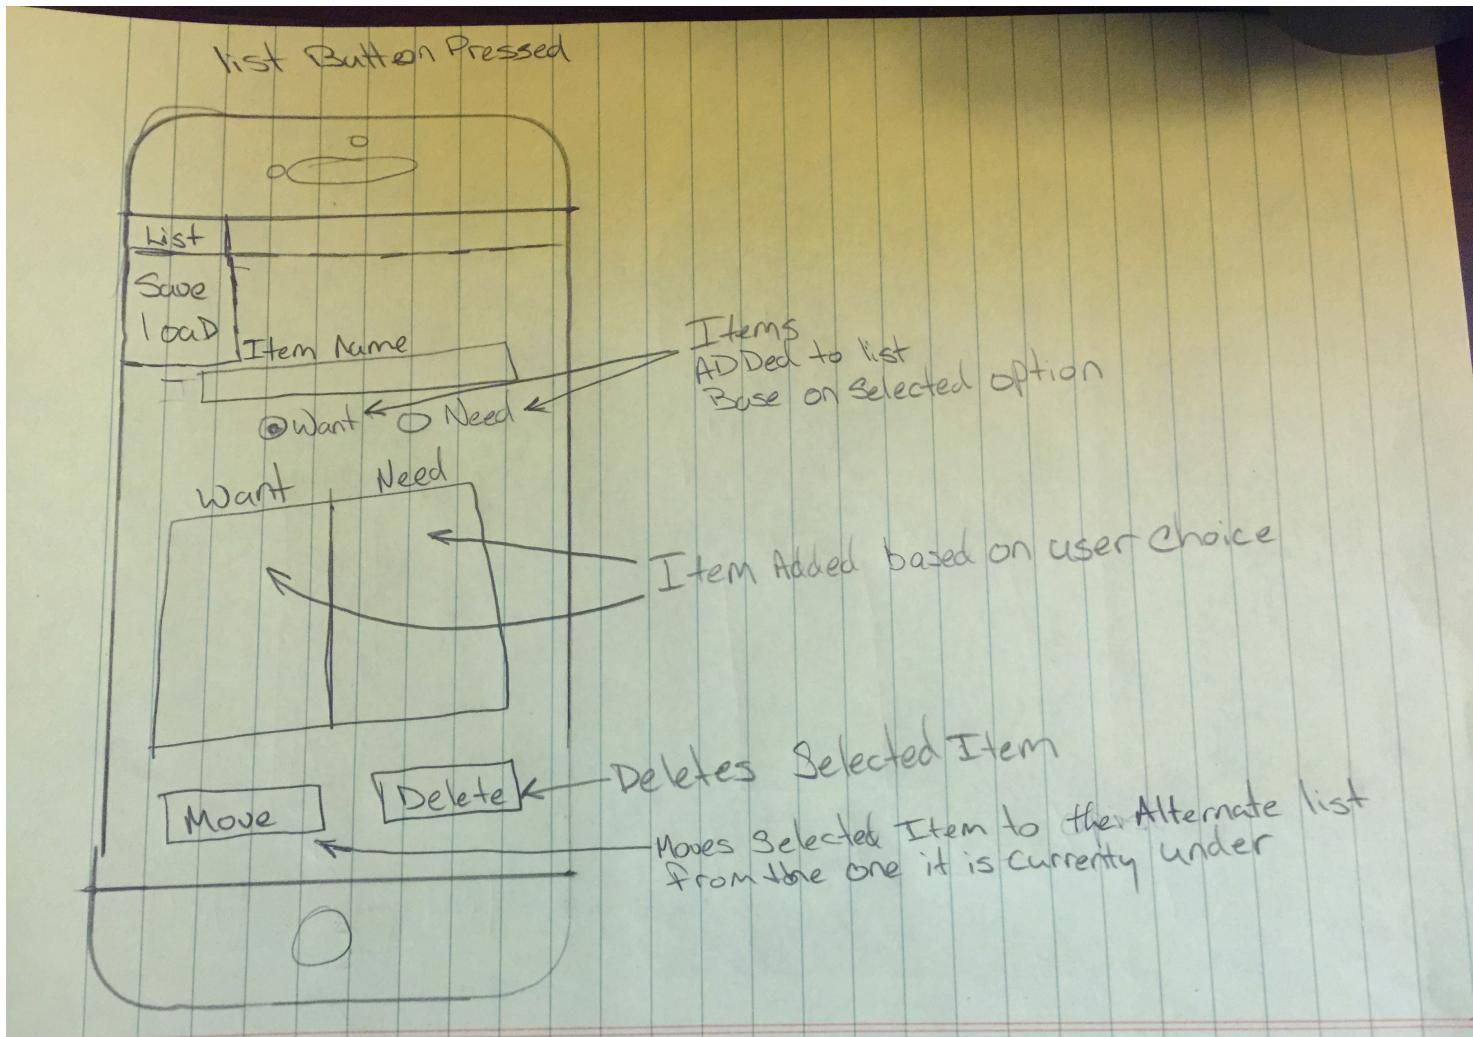

As a user I want to know when I have won the game so that I can show my friend that I have won.
